

Potential benefits of green value chain trade partnerships

→ Fig. 10

Exporter:

Green value creation, leading to direct job gains and contributing to a just energy transition.

Importer:

Securing the majority of direct jobs by ensuring the competitiveness of energy-intensive industry.

Climate:

Accelerating the transition of energy-intensive industry by reducing cost.

Indirect effects:

Cheaper end products, benefiting all consumers and reducing the "cost of living" crisis, often attributed to green policies.
